

THE 21 NATURAL PRINCIPLES TO DYNAMIZE WATER APPLIED IN THE BIODYNAMIZER®

- ① Triple centripetal and vertical vortex (counter-clockwise)
- ② Double longitudinal vortex
- ③ Clockwise & counter-clockwise vortices (rotation reversal)
- ④ Columnar vortex (clockwise) with constant diameter in free flow (extremely fast rotation producing thousands of vortices in a mass of water which rotates much more slowly and in the same direction)
Aquifer part in contact with water composed of **diamagnetic, bactericidal, antiviral and conductive materials**:
 - ⑤ ○ copper
 - ⑥ ○ brass
 - ⑦ ○ silver (for all soldering of the 11 metal parts of the Biodynamizer®)
- ⑧ The **amplitude** of the dimensions of the Biodynamizer®: H = 897 mm & the internal smooth surfaces produce a great kinetic energy
- ⑨ Different alternating **magnetization intensities**: 1.4 T & 0.4 T & 1,4 T
- ⑩ Different **alloys of magnetic materials** inducing different frequencies of magnetizations: ferrites, neodymium
- ⑪ Different **shapes of magnets**: rectangular & annular (different distances from the poles) & having the golden number proportions
- ⑫ Different **volumes of magnets** (different amounts of material that influence the magnetization gradients)
- ⑬ **3 magnetization axes** with alternating polarizations (X, Y, Z), perpendicular (axial) and toroidal (radial)
- ⑭ A magnetic rotation producing a **clockwise magnetic vortex**: either rotary magnetization axes, in the X & Y axes, whose polarization rotates clockwise in 90 ° increments
- ⑮ Different **magnetization gradients**: different phases of magnetic intensities over the distance (between the poles)
- ⑯ **Interaction between mechanical vortices & magnetic fields** which amplifies magnetic energy
Transmission of natural dynamization frequencies:
 - ⑰ ○ 9 Kg of **specific minerals**: volcanic lava rock stones, pebbles of Carrara marble and ceramics informed by effective micro-organisms
 - ⑱ ○ **Noble dynamization frequency transmissions (copper, gold, silver)** via magnetic fields
 - ⑲ ○ All the forms, angles, rhythms of the Biodynamizer® respect the proportions of the **golden number Phi** (1-1,618) which transmit frequencies of natural patterns
- ⑳ Different sequential wave rhythms of acceleration-deceleration, high & low pressures (*venturi effect*)
- 21** Quantum coherence of the entire device (different harmonic rhythms of expansions-contractions according to the cycle of nature Φ)
