To dynamize the water, 3 successive steps are essential:
- **Filtration (Biofilter)**
- **Restructuration (Biodynamizer)**
- **Dynamization of water (Biodynamizer)**

The tap water in your home will thus turn into **dynamized water, comparable to mountain water!**

As first step, it is important to remove the pollutants that it may still contain. Therefore, we offer a new technology of filtration with activated carbon compressed in a hollow fiber which integrates ionized silver. The **Biofilter** is probably the most efficient and effective high-capacity activated carbon filter on the market (filter cartridge valid for +/- 1 year for a family of 4). **Certificate of Sanitary Conformity issued by the Carso laboratory: n° 21 ACC LY 990**

Then, the water must be dynamized thanks to the Biodynamizer® which reproduces the natural water cycle in an accelerated way by copying the movements of the water which flows freely in nature since centuries. This 100% natural technology regenerates the water to make it comparable to mountain water filled with (photonic) energy. The **Biodynamizer** works without electricity, without maintenance and without consumables and can be easily moved in case of moving. To drink without moderation! **Certificate for Conformity of the metals in contact with water issued by Eurofin.**

In the event that the hardness of the city water exceeds 40° f (French degrees) then we recommend an additional limestone treatment device, the **Biolimescaler®**. The Biolimescaler is **guaranteed for life**.

PRICELIST EU (EUROPEAN UNION) – 2022

Recommended price list* (prices can be changed at any time)	Purchase price Excl. Taxes Excl. Customs Excl. Transport
Biodynamizer® : dynamizer (no maintenance, no consumables)	**2.990 €**
Biofilter® : filter (Inox housing + cartridge 150 m³ included)	**490 €**
Biolimescaler* : additional treatment against limestone ; optional	**790 €**
Additional replacement cartridge for the Biofilter ; capacity 150 m³	**190 €**

* Prices may vary by **+/- 10%** on export depending on the country of delivery of the devices
