

Biodynamizer®
Enjoy the natural movement of life

DRINK BETTER! DYNAMIZE YOUR TAP WATER LIKE MOUNTAIN WATER !

WWW.BIODYNAMIZER.COM

FINDINGS

- Our body cells are made up of 99% water molecules. Therefore they need high quality water.
- For thousands of years, human beings have always drunk living water, full of energy, because it springs naturally from its source.
- Today, we drink stagnant water, oxidizing, without energy and often polluted ...
- The water in most plastic bottles contains an average of 325 plastic microparticles/L and endocrine disruptors.
- The ecological footprint of a person who consumes 1.5 L of mineral water in plastic bottles per day is 150 kg of CO₂ / year (packaging counts for 70%, then transport for 20% and distribution for 10%).

This is why it is important to avoid consuming water in plastic bottles and to favor purified and dynamized water produced on site in your home!

THIS IS WHY...

... we propose a **Biofilter**[®], to purify the water, and a **Biodynamizer**[®] which returns its natural energy. The Biodynamizer[®] is a device that reproduces the movements of water that has been flowing freely in nature. This **100% natural technology** makes it possible to regenerate the water from all the taps in a house to make it comparable to mountain water.

"Inspired by nature to regain the nature of water"

BIOFILTER®: A HIGH-PERFORMANCE TRIPLE FILTRATION

Before dynamizing city water, it is important to first remove the remaining pollutants. To do this, we offer **high-performance triple filtration** of new technology using activated carbon compressed in a hollow fiber that incorporates ionized silver. The Biofilter is probably the most efficient and effective large capacity* activated carbon filter on the market.

*filtration cartridge valid +/- 1 year for a family of 5.

The Biofilter will remove a large part of the pollutants that would still be present in city water (i.e. chlorine, bad tastes and odours, pipe corrosion, bacteria, chemicals, nitrates & nitrites, sulphates, heavy metals...) while preserving its trace elements and minerals that are good for our **health**.

The minerals contained in water (mainly calcium and magnesium) contribute between 20% and 50% to the Recommended Nutritional Intake (depending on the mineral content of the water and the age of the people concerned). These minerals have a beneficial role in particular for hypertension, cardiovascular accidents, cancers, fatigue, diabetes, coronary insufficiencies, osteoporosis...

"Water is not necessary for life, it is life" - A. de St Exupéry

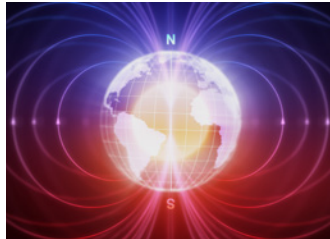

THE BIODYNAMIZER® APPLIES 21 PRINCIPLES OF WATER DYNAMIZATION

Restore your tap water to its original properties thanks to the Biodynamizer, i.e. water that is regenerated and dynamized thanks to the 3 basic principles of water dynamization:

THE VORTICES

These are the natural movements of water as it flows freely (either spirals or whirlpools).

THE MAGNETISM

The Earth is a magnetosphere whose magnetism is communicated to water and its minerals.

NATURAL MINERAL FREQUENCIES

Carrara Marble, Lava rock, informed Ceramic

"Observe, Understand and Copy Nature" - Viktor Schauberger

THE ADVANTAGES OF DYNAMIZED WATER

Purified water

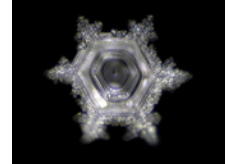

A soft and round taste

More hydrating and less oxidized water

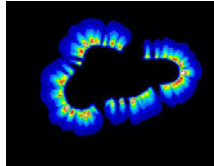

Restructured water

A solution for the whole house

An ecological solution

Water that benefits from more energy in quantity & quality

An economical solution

Comparative types of water	Chlorine	Pollutants	Minerals	Pharmaceuticals	Heavy metals	Limescale treatment	Structure (molecules)	Energy (photons)
 Dynamized water	+	+	+	+	+	+	+	+
 Bottled water	+	+	○	+	+	NA	○	○
 Tap water	-	○	○	○	○	-	○	○
 Softened water	-	-	○	-	-	+	○	○
 Osmosis water	+	+	-	+	+	NA	-	-

NA = Not applicable
