

Biodynamizer®

Enjoy the natural movement of life

DRINK BETTER! DYNAMIZE YOUR TAP WATER LIKE IN NATURE !

WWW.BIODYNAMIZER.COM

FINDINGS

- Our body cells are made up of 99% of water molecules. Therefore they need high quality water.
- Today, we drink water without energy and often polluted because it contains residual pollutants...
- The water in most plastic bottles contains an average of 325 plastic microparticles/L and endocrine disruptors.
- The ecological footprint of a person who consumes 1.5L/day of mineral water in plastic bottle is 150 kg of CO₂/year (packaging counts for 70%, then transport for 20% and distribution for 10%).

This is why it is important to favor zero kilometer tap water, filtered and dynamized on site in your home. Your body, the planet, your wallet... everyone is a winner!

THIS IS WHY...

... we propose the **Biofilter**, to filter the water, and the **Biodynamizer** which dynamizes it and treats limescale ecologically.

The Biodynamizer is a device that reproduces the **natural movements of water** in order to make it comparable to mountain water. This **technology** makes it possible to regenerate the water from all the taps in a house.

BRING NATURE INTO YOUR GLASS OF WATER EVERY DAY.

BIOFILTER: A HIGH-PERFORMANCE TRIPLE FILTRATION

Before dynamizing city water, it is important to first remove the remaining pollutants and unpleasant odours. To do this, we offer **high-performance triple filtration** using activated carbon compressed in a hollow fiber that incorporates ionized silver.

The Biofilter, which integrates the **Bio Pro** filtration cartridge, is probably the most efficient and effective large capacity* activated carbon filter on the market.

*filtration cartridge valid +/- 1 year (or max 150m³) for a family of +/- 5.

The Biofilter will remove a large part of the pollutants that would still be present in city water (i.e. chlorine, bad tastes and odours, pipe corrosion, bacteria, organic pesticides, heavy metals...) while preserving its trace elements and minerals that are good for our **health**.

The minerals contained in water (mainly calcium and magnesium) contribute between 20% and 50% to the Recommended Nutritional Intake of calcium and magnesium for one person (depending on the mineral content of the water and the age of the people concerned). These minerals have a beneficial role in particular for hypertension, cardiovascular accidents, cancers, fatigue, diabetes, coronary insufficiencies, osteoporosis...

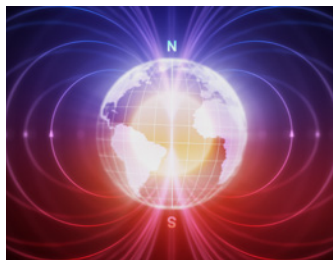

"Water is not necessary for life, it is life" - A. de St Exupéry

THE BIODYNAMIZER DYNAMIZES WATER BY APPLYING THE FOLLOWING 3 PRINCIPLES OF BIOMIMICRY :

THE VORTICES

These are the natural movements of water (either spirals or whirlpools).

THE MAGNETISM

The Earth is a magnetosphere whose magnetism is communicated to water and its minerals.

NATURAL MINERAL FREQUENCIES

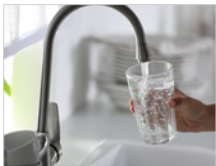

Carrara Marble, Lava rock, Ceramic informed by effective micro-organisms

"Observe, Understand and Copy Nature" - Viktor Schauberger

THE ADVANTAGES OF DYNAMIZED WATER*

* see analyses and observations at www.biodynamizer.com

Filtered tap water

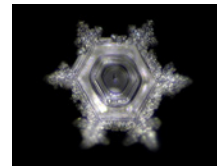

A rounder taste

More hydrating and less oxidized water

Restructured water

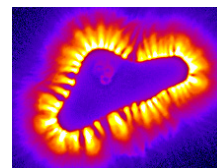

A global solution for the whole house

An ecological and economical solution

Ecological limescale treatment

Water containing more photonic energy

Comparative types of water		Chlorine	Pollutants	Minerals	Sodium	Limescale treatment	Heavy metals	Structure (molecules)	Energy (photons)
