

PRICE LIST EU- CLIENTS

To dynamize the water, 3 successive steps are essential:

- **Filtration (Biofilter)**
- **Restructuration of water molecules (Biodynamizer)**
- **Dynamization of water (Biodynamizer)**

The tap water in your home will thus turn into **dynamized water, comparable to mountain water!**

The **Biofilter** applies a **triple filtration** of new technology including a pre-filter and activated carbon filtration compressed in a hollow fiber which retains pollutants up to a diameter of **5 microns** and which incorporates ionized silver. The filtration cartridge **Bio Pro** must be replaced every **150 m³ (150,000 L) & max after 1 year of use**. The Biofilter is certified by the **Carso** laboratory which issued it with a Sanitary Conformity Certificate (21 ACC LY 990).

Then, the water must be dynamized thanks to the **Biodynamizer** which reproduces the natural water cycle in an accelerated way by copying the movements of the water which flows freely in nature since centuries. This 100% natural technology regenerates the water to make it comparable to mountain water filled with (photonic) energy. The **Biodynamizer** works without electricity, without maintenance and without consumables and can be easily moved in case of moving. To drink without moderation! **Certificate for Conformity of the metals in contact with water issued by Eurofin (22-FST9-060). Belgaqua Certificate of Conformity according to standard EN1717 (VIV0442023).**

In the event that the hardness of the city water exceeds 40° f (French degrees) then we recommend an additional limestone treatment device, the **Biolimescaler**. The Biolimescaler is **guaranteed for life**.

PRICELIST EU (EUROPEAN UNION) – 2025

Recommended price list* (prices can be changed at any time)	Purchase price Excl. Taxes Excl. Customs Excl. Transport
Biodynamizer : dynamizer (no maintenance, no consumables)	3.140 €
Biofilter : filter (housing + Bio Pro cartridge 150 m ³ included)	592 €
Biolimescaler : additional treatment against limestone ; optional	1.195 €
Additional replacement Bio Pro cartridge for the Biofilter ; capacity 150 m ³	209 €

* Prices may vary by +/- 10% on export depending on the country of delivery of the devices
