BIOFILTER: A HIGH-PERFORMANCE TRIPLE FILTRATION

Before **dynamizing** city water, it is important to first remove the remaining pollutants. To do this, we offer **high-performance triple filtration** using activated carbon compressed in a fiber that incorporates ionized silver.

The Biofilter, which integrates the **Bio Pro** filtration cartridge, is probably the most efficient and effective large capacity* activated carbon filter on the market.

*filtration cartridge valid +/- 1 year (or max 150m³) for a family of +/- 5.

The Biofilter will remove a large part of the pollutants that would still be present in city water (**i.e. chlorine, bad tastes and odours, pipe corrosion, bacteria, organic pesticides, the PFAS, heavy metals...**) while preserving its trace elements and minerals that are good for our **health**.

The minerals contained in water (mainly calcium and magnesium) contribute between 20% and 50% to the Recommended Nutritional Intake of calcium and magnesium for one person (depending on the mineral content of the water and the age of the people concerned). These minerals have a beneficial role in particular for hypertension, cardiovascular accidents, cancers, fatigue, diabetes, coronary insufficiencies, osteoporosis...

"Water is not necessary for life, it is life" - A. de St Exupéry

THE BIODYNAMIZER DYNAMIZES WATER BY APPLYING THE FOLLOWING PRINCIPLES OF BIOMIMICRY:

THE MOVEMENTS

Centripetal vortices
(Rivers)

Accelerations
(Narrowings)

Longitudinal vortices
(Meanders)

Columnar vortex
(Waterspout)

FREQUENCIES

Minerals
(Mineral frequencies)

Magnetic fields
(Earth = Magnetosphere)

Universal Energy
(The Ohmère bottle)

"Observe, understand and copy nature" - V. Schaubeger

THE ADVANTAGES OF BIODYNAMIZED WATER

see analyses and observations at www.biodynamizer.com

A global solution for the whole house

Filtered and dynamized tap water

A rounder taste

Water containing more energy

Ecological limescale treatment

An economical solution

More hydrating and less oxidized water

Restructured water

	Comparative table Water types	Chlorine	Pollutants	Minerals	Salt	Limescale treatment	Plastic	Structured	Energized
